Professional Summary

Detail-oriented BCA + MCA (Data Science) student with hands-on experience across 6 independent projects and 7 industry certifications spanning Python, SQL, EDA, and visualization. Skilled at turning raw information into actionable insights through academic coursework and self-driven work. Seeking Data Analyst, Data Science Intern, or entry-level roles applying analytical, statistical, and problem-solving skills to real business decisions.

Technical Skills

- **Programming & Querying:** Python (Pandas, NumPy, Matplotlib, Seaborn), SQL (Joins, Subqueries, Aggregations).
- **Data Analysis:** Data Cleaning & Preprocessing, Exploratory Data Analysis (EDA), Statistical Analysis & Business Insights.
- **Visualization & Tools:** Power BI, Microsoft Excel, Google Workspace.
- **Web & Other:** HTML, CSS, JavaScript, Android Development, API Integration.

Projects

AI Chatbot using Python and API Integration

Jun 2026 – Present

- Built an AI-powered chatbot in Python, integrating external APIs to generate real-time, context-aware conversational responses.
- Engineered prompt design and error-handling logic to improve reliability and deliver accurate, user-friendly interactions.

Unemployment Data Analysis (Python)

- Cleaned and preprocessed a multi-year unemployment dataset using Pandas and NumPy to surface long-term employment trends.
- Built visualizations with Matplotlib and Seaborn, translating findings into clear, actionable insights for decision-making.

Iris Flower Classification – Machine Learning (Basics)

- Preprocessed the 150-sample Iris dataset and engineered features across 3 flower species to support classification modeling.
- Visualized feature relationships to strengthen understanding of model evaluation and classification concepts.

Rain Detector Project

Awarded “Best Project” by DIOS

- Designed and built a functional hardware-based rain detection system, earning a “Best Project” award for technical execution.

Smart India Hackathon – “Swadeshi Aatmanirbhar Bharat”

- Collaborated with a team to build a web-based solution promoting self-reliance initiatives within a fixed hackathon timeline.
- Contributed to problem analysis, solution design, and the final stakeholder presentation.

Personal Portfolio Website – Web Development

- Built a responsive personal site using JavaScript, HTML, and CSS to showcase 6 projects and core technical skills.
- Applied clean UI/UX principles across multiple sections for a polished, professional presentation.

Education

University of Allahabad

Prayagraj, India

BCA + MCA (Data Science)

Started August 2024

Ranked in Top 5 of college academics.

Certifications

- Deloitte Australia – Data Analytics Job Simulation.
- Tata – GenAI Powered Data Analytics Job Simulation.
- BCG – GenAI Job Simulation.
- AI Foundations – OpenAI.
- Introduction to Generative AI.
- Python Programming for Beginners: Learn from Scratch.
- ChatGPT for Everyone.

Honors & Awards

- 1st Rank / “Best Project” Award – Rain Detector Project (DIOS).
- 2nd Runner-Up – Google Developer Group (GDG) Android Application Development Program; top 3 finish demonstrating software engineering and product development skills.
- 2nd Rank – “AI in Science and Technology” 3-Day National Seminar, University of Allahabad; recognized for applied machine learning research and technical depth.
- Ranked Top 5 in College Academics.
